SUMMARY

AI/ML Software Developer specializing in production-grade Generative AI systems, real-time communication infrastructure, and large-scale platform integrations. Currently engineering AI-driven product features at NeoRains, including the core infrastructure of Stobay.ai, a document-intelligence and enterprise chatbot platform. Experienced in building real-time audio streaming pipelines (WebRTC, WebSocket, ASR), camera-based augmented reality (AR) navigation systems, and multi-agent AI automation workflows. Hands-on expertise spanning RAG pipelines, LLM orchestration, cross-platform API integrations (Microsoft Teams, Meta, LinkedIn), and intelligent workflow automation. Proven ability to independently lead technical implementations from architecture to client delivery.

PROFESSIONAL EXPERIENCE

AI/ML Software Developer · NeoRains

Jan 2026 – Present | Madurai, India · On-site

Core contributor to Stobay.ai an enterprise AI chatbot platform powering document-based Q&A for businesses:

- Architected and deployed end-to-end RAG (Retrieval-Augmented Generation) pipelines using vector databases and semantic embedding models.
- Engineered Microsoft Teams App integration via Microsoft Partner Center and Azure Bot Framework, delivering a fully certified Teams-native AI assistant to enterprise clients.
- Built Meta (Facebook/Instagram) platform integrations through the Meta Developer Portal, enabling Instagram DM automation and social-channel AI response capabilities.
- Developed LinkedIn Profile Scraping pipelines and integrated LinkedIn Developer Portal APIs for professional data extraction and enrichment workflows.
- Implemented intelligent web scraping infrastructure using Firecrawl, Bright Data, and custom extraction agents to continuously enrich the platform's knowledge sources.
- Designed and deployed multi-agent AI workflows using CrewAI and LangChain, enabling autonomous task execution across research, summarisation, and lead-generation pipelines.
- Built N8N-based marketing automation flows integrating AI-generated content, CRM triggers, and multi-channel outreach, reducing manual marketing overhead for clients.
- Led client-facing technical demonstrations and requirement-gathering sessions, translating business needs into shipped product features on schedule.
- Attended Umanage Chennai 2025 technology summit, representing NeoRains and engaging with enterprise AI adoption trends and ecosystem partners.

AI/ML Software Developer · ABOSS Technologies

Aug 2025 – Jan 2026 | Madurai, India · On-site

- Developed an interactive campus navigation web application with real-time GPS tracking, shortest path routing using Dijkstra's algorithm, and dynamic map layers using Leaflet.js and Google Maps API.
- Built a camera-based augmented reality (AR) navigation module using device camera feed, sensor fusion, and GPS position smoothing, enabling real-time directional overlays and indoor/outdoor wayfinding on mobile devices.
- Implemented real-time audio communication infrastructure using WebSocket-based Push-to-Talk (PTT) with multi-device session management and live broadcasting.
- Integrated speech-to-text (STT/ASR) capabilities with automated audio transcoding pipeline, delivering real-time live captions across web and mobile interfaces.

PROJECTS

Autonomous Multi-Agent Spatial Intelligence Platform

Technologies: Python, FastAPI, PostgreSQL, PostGIS, Qdrant, LangGraph, GDAL, MapLibre GL, React

- Architected an end-to-end spatial intelligence platform that orchestrates satellite imagery analysis (SAR and Optical) to automatically detect, segment, and map flood-affected regions from natural language queries.
- Designed a spatial hybrid RAG pipeline leveraging Qdrant vector database and PostGIS to perform dual-vector semantic search and geospatial boundary filtering across satellite datasets.
- Delivered real-time map tile streaming and automated reporting workflows, integrating MapLibre GL for dynamic raster visualization and generating actionable flood dossiers with GeoJSON exports.

TECHNICAL EXPERTISE

GenAI & LLMs:

RAG Architectures · Vector Databases · Semantic Embeddings · LLM Orchestration · Prompt Engineering · Fine-tuning · LangChain · CrewAI · Multi-Agent Systems

Platform Integrations:

Microsoft Teams App (Partner Center) · Meta / Facebook Developer Portal · LinkedIn Developer Portal · Instagram API · Google Cloud Console · N8N Automation

Real-Time ASR & Speech AI:

Sarvam AI (Saaras v3) · Whisper · Real-Time Captioning Pipelines

Algorithms & Mapping:

Dijkstra's Pathfinding Algorithm · Leaflet.js · Geolocation APIs · Spatial Data (KML)

EDUCATION

Master of Science - Computer Science (AI & ML Specialisation)

CGPA: 8.7 | 2023 - 2025

Madurai Kamaraj University, Madurai, India

Bachelor of Science - Computer Science

CGPA: 7.9 | 2019 - 2022

The American College of Arts and Science, Madurai, India
